

BUSINESS ANALYTICS COMMITTEE

Purpose:

Oversees the use of analytical application projects to align with and support the University's strategic goals by endorsing or sponsoring analytical initiatives that foster the gain of valuable knowledge from data to provide insight to recommend action or to guide executive decision making

Charge:

For NKU to achieve its desire to be a data driven university, it should strive to apply analytics to improve institutional performance. This committee should be involved in activities such as, but not limited to:

- Develop overall strategy and plans for reporting and analytics
- Inventory campus requests for analytical application projects and recommend priorities to the IT Policy Council (ITPC); coordinate analytical activity across the institution
- Review formal business requirements for approved analytical projects
- Oversee approved analytical projects to ensure institutional initiatives are properly scoped, executed, and communicated
- Understand the use or purpose of the existing analytical software products and recommend additional analytical software products
- Advise on administrative issues related to analytics projects (e.g., security, training, campus communication)
- Research best practice measurement practices to ensure return on investment (ROI)
- Function as a source for issue escalation and facilitate resolution of matters negatively impacting analytical project progress
- Promote analytics at an executive and senior management level
- Approve presentation standards and best practices for the licensed analytical software products
