Material Handler - PIV (second shift) in Walton, Kentucky

Description

Perform any essential duties needed to keep a smooth flow of Operations on the shop-floor, and to ensure that parts/components are shipped on time to customers in addition to coordinating with other functions within EDC as required.

- Utilize prescribed safety equipment and operate powered industrial equipment and machinery according to specified instructions. Demonstrate the ability to recognize potential safety hazards.
- Safely transport products within the warehouse using PIVs – powered industrial vehicle.
- Using an RF scanner, pick customer orders in a safe and efficient manner using established quality picking processes.
- Perform cycle counts to ensure the site maintains location/piece/financial accuracy as required by Cummins corporate standards.
- Unload domestic and international supplier shipments and ensure the products are put-away in their respective part-family locations within the allotted time.
- Shrink-wrap, label and load palletized products into outbound trailers.
- Shrink-wrap, label, weigh, load pallets into international containers per SOLAS regulations.
- Systemically close, dispatch outbound shipments and provide completed paperwork to shipping clerk.
- Replenish product from storage locations to pick faces as directed by the WMS system.
- Assist other pickers in team lift operation when picking products over 50 lbs. to ensure the safety of our employees.
- Maintain certification to operate one or more types of PIV used in the distribution center. The certification is required for safe operation of PIVs in the distribution center.
- Frequent lifting, occasionally team-lift parts over 50 lbs. Frequent walking, pushing, kneeling, stooping, bending, & squatting.
- Operate PIV battery changer, change batteries and floor scrubber as requested by operations throughout the day.
• Maintain pallet staging areas for good and bad pallets. Unload good pallets from trailer and stage in the good pallet staging area for operations. Load bad pallets from bad pallet staging area into trailer for removal.

• Must be able to perform all functions listed under the job requirements of Warehouse associate.
