Northern Kentucky University

Name of Program: Middle School Education: English, Mathematics, Science, Social Studies

Certification Level: Initial Undergraduate Baccalaureate, Post Baccalaureate

Program Codes: KG 30 (2293, 2297), KG 71 (2197, 2201), KG 50 (2389, 2393), KG 20 (2485, 2489)

Modes of Delivery: Face to Face Only

2016-17 Catalog URL: http://nku.catalog.acalog.com/index.php?catoid=4
**Program Experiences**

The Middle School education program is delivered as a face to face program on the main Northern Kentucky University (NKU) campus. The program facilitates the teacher candidates’ construction of knowledge, the development of instructional skills, and the practice of professional dispositions that enhance the development of all learners. The Middle School teacher preparation program has defined the content knowledge that its graduates must possess through the courses they are required to take and the grade point average they are required to maintain. These course requirements and their experiences are consistent with the essential knowledge of Middle School education educators as defined by the Association for Middle Level Education (AMLE). Candidates must further demonstrate knowledge of their content, teaching skills, and dispositions through their coursework and field and clinical experiences.

The program experiences in the Middle School Education Program include four major strands:

A. **Liberal Arts Foundation**: Candidates develop a strong foundation in the liberal arts which includes experiences in communication and literature, history, natural sciences, mathematics, humanities and fine arts, philosophy, social and behavioral sciences, and race/gender perspectives. These experiences are defined by the University and by the College of Education and Human Services. All candidates must complete the general studies requirements for all majors in the University.

B. **Content Knowledge**: A comprehensive series of courses and experiences in the pre-service teacher’s areas of certification provides him/her with a current and sufficient knowledge of the major concepts and the skills needed to develop the candidates’ certified subject areas. The courses provide candidates with the necessary knowledge to demonstrate competency on Kentucky Teacher Standard I, Knowledge of Content, align their instruction with the Kentucky Academic Standards, and successfully complete the PRAXIS content examinations. Refer to the curriculum contract for more detailed information.

C. **Professional Knowledge**: A sequence of professional education courses and experiences based on the Kentucky Teacher Standards and the Association of Middle Level Education Standards are part of the curriculum. The courses are designed to prepare candidates to provide diverse students with the knowledge and skills required for the 21st century, as defined by the Kentucky Academic Standards, and to successfully complete the PRAXIS Principles of Learning and Teaching examination.

D. **Field and Clinical Experiences**: A series of high-quality field and clinical experiences, aligned with the Kentucky Teacher Standards, are designed to enable candidates to develop the knowledge, skills, and dispositions necessary to demonstrate positive impact on PK-12 students’ learning and development. The clinical component of the middle grades program is central to the candidates’ professional learning. Prior to admission to their final clinical experience (student teaching), candidates complete a minimum of 200 field experience hours, providing them the opportunity to connect the theory of their coursework with practice in a Middle School setting. During field experience, candidates are placed in a variety of Middle School settings, including schools with diverse populations of students. Prior to the final clinical experience, all candidates must demonstrate their ability to work with PK-12 students from different races or ethnic groups,
students of varying socio-economic status, English language learners, and students with special needs. In addition, candidates must also complete a series of required experiences to help them better understand schooling at all levels and the profession they are about to enter. These experiences include engagement with students of all levels (i.e., elementary, middle, secondary), student tutoring, interaction with families of students, attendance at school board and school-based council meetings, observation at a family resource center, and participation in a school-based professional learning community. All experiences are tracked through the Kentucky Field Experience Tracking System (KFETS) and Foliotek (electronic portfolio). The middle grades education program concludes with a comprehensive, full-time clinical experience that is 16 weeks in duration (8 weeks in each teaching content area). All field and clinical experiences are completed in a co-teaching environment with the expectation that candidates learn from their PK-12 clinical educator by co-planning instruction, co-teaching when appropriate, and co-assessing their students’ progress. Throughout all field and clinical experiences, candidates’ experiences are closely aligned with their corresponding coursework, and candidates’ knowledge, skills, and dispositions are continuously assessed by both PK-12 clinical educators and university clinical educators using performance-based measures.

Professional Education Courses
A sequence of professional education courses and experiences based on the Kentucky Teacher Standards and AMLE Standards are designed to prepare teacher candidates with the knowledge and skills required to demonstrate mastery of the Kentucky Academic Standards. The four semesters of the professional education sequence – Admission, Professional I, Professional II, and Clinical Experience – are described below.

Candidates must receive at least a “C” or a “P” in all education/pedagogy courses listed below to be eligible to enroll in the next professional semester. In addition, all education candidates are required to take EDU 104, Orientation to the Education Profession, before enrolling in any education course. This is a one-credit hour course that introduces candidates to NKU’s education program requirements, including the Code of Ethics, the professional dispositions’ survey, and discussion and observations in the Middle School, middle grades, and secondary education levels.

Undergraduate students must apply for admission to the teacher education program. This is a two-step process. The first step is to enroll in the Admission Field Experience (EDU 309 or 334). The second step is to be admitted to the education program.

To enter the admission field experience, a candidate must have:

* Completed the required application for admission;
* Successfully completed a background check;
* Successfully completed EDU 104, Orientation to the Education Profession, with a “C” or better;
* Earned a cumulative grade point average of 2.75 or higher on a 4.0 scale OR a grade point average of 3.0 on a 4.0 scale on the last thirty (30) hours of credit completed;
* Earned a minimum of 45 semester hours of course work;
* Achieved the KY EPSB required passing scores on the Praxis CASE tests administered by the Educational Testing Service (ets.org) with the current minimum scores:
  * Core Academic Skills for Educators: Reading (5712)- 156
  * Core Academic Skills for Educators: Writing (5722)- 162
  * Core Academic Skills for Educators: Mathematics (5732)- 150
To achieve admission to the teacher education program, a candidate must have successfully completed all of the above plus the following:

* Earned 60 semester hours of course work;
* Earned a cumulative grade-point average of at least 2.75 on a 4.00 scale OR a grade point average of 3.0 on a 4.0 scale on the last thirty (30) hours of credit completed;
* Earned at least a “B” in ENG 291 or equivalent;
* Earned at least a “B” in CMST 101 or equivalent;
* Earned at least a “C” in EDU 300, EDU 305, EDU 313, and EDS 360 or equivalent
* Earned a “P” in the Admission Field Experience course (EDU 303, EDU 307, EDU 309, EDU 311, or EDU 334).

*Demonstrated the following skills: critical thinking, communication, creativity, and collaboration, as follows:

- **Communication**: Completion of CMST 101 and ENG 291 with a grade of “B” or better;
- **Creativity**: Completion of any course under "Culture & Creativity: Arts and Humanities" with a grade of “C” or better;
- **Critical Thinking**: Completion of any course under "Scientific & Quantitative Inquiry: Natural Science OR Mathematics & Statistics" OR any course from "Self & Society: Individual and Society" with a grade of “C” or better;
- **Collaboration**: Completion of Admissions Field Experience, EDU 309, with a grade of “P”;

* Signed a curriculum contract;
* Completed an approved ePortfolio during the Admission Field Experience;
* Received approval of the teacher education committee.

### A. Admission Semester

Once candidates have met the above described criteria, they may enroll in the Admission Field Experience course, EDU 309. Teacher candidates complete at least 50 hours in their assigned school during the admission field experience. The courses included in the Admission Semester focus candidates’ attention on reading about and critically analyzing many dimensions of professional education. In addition, through field placements, candidates have the opportunity to observe and participate in specific school activities and experiences. The courses included in the Admission Semester are listed below. Co-requisite courses to the EDU 309 Field Experience are noted. If the course is not designated as a co-requisite course, then it may be completed before enrolling in EDU 309.

EDU 300 Human Growth and Development - 3 semester hours
EDU 305 Introduction to Education - 2 semester hours
EDU 309 Admission Field Experiences for Middle School Grades - 2 semester hours
EDU 313 Computer Applications for Teachers - 2 semester hours – **Co-requisite with EDU 309**
EDS 360 Children with Exceptionalities in the School - 3 semester hours- **Co-requisite with EDU 309**

In the Admission Semester, teacher candidates complete at least 50 hours in their assigned school. Activities are structured to ensure that teacher candidates are fully integrated in the school setting. For example, to help them begin to better understand the diversity of school populations, candidates are asked to: 1) look for strategies teachers use to effectively teach diverse populations, 2) study and identify growth patterns and distinctive behaviors across cultures, and 3) discuss cultural patterns in society and how these patterns have altered the ways schools are organized and instruction is delivered.
Candidates grow in their knowledge of multiple assessments through: 1) an introduction to standardized assessment and state accountability, 2) an introduction to the Kentucky Teacher Standards, 3) assisting teachers as needed during their hours in the school, and 4) working with students individually and in small groups. Intellectual vitality is promoted as candidates gain a framework from which to view education. The candidates use professional knowledge related to educational philosophies, school structures, human growth and development, and field experiences to build their own philosophies of education. Productive membership in a professional community is stressed by asking candidates to observe interactions in schools where they are placed, contact area agencies which impact the study and application of Human Growth and Development, and observe and evaluate governance patterns in the schools where they are placed. Candidates learn about technology and its importance in the classroom and workplace through the EDU 313 class. Candidates are asked to review and learn to use technology hardware and software and develop class projects that require the use of computer probes and internet communications.

During the admission semester, field experience candidates are introduced to the college’s Code of Ethics as well as the state of Kentucky’s Professional Code of Ethics. Candidates are required to read and sign each Code of Ethics, indicating their understanding and agreement to adhere to the codes. Candidates are required to electronically sign a copy of each Code of Ethics in their Foliotek ePortfolio, which is one of the criteria candidates are evaluated on for successful completion of their admission semester ePortfolio.

Candidates are typically placed in a diverse school, with two certified PK-12 clinical educators, for a minimum of 50 hours. The university and PK-12 clinical educators collaborate to provide meaningful experiences, enabling candidates to meet NKU program requirements and Kentucky Teacher and AMLE Standards. The field experience for all Middle School education candidates in the Admissions Semester is designed to provide experiences related to the courses in the block. To advance to Professional Semester I, teacher candidates must successfully complete all Admissions Semester requirements and receive a satisfactory dispositions’ evaluation from the PK-12 and university clinical educators, as well as a satisfactory ePortfolio evaluation from the university clinical educator.

**B. Professional Semester I**

Once candidates complete the Admission Semester and meet all requirements for admission to the Middle School Education Program, they enroll in Professional Semester I. The purpose of Professional Semester I is to continue to assist the teacher candidate toward mastery of the Kentucky Teacher Standards, AMLE Standards, and other NKU program requirements. Specifically, Professional Semester I focuses on the development of knowledge and skills for assessing student performance, adapting instruction for children with disabilities, and exploring the foundations of middle school education.

The courses included in Professional Semester I are:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Credit Hours</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDU 344</td>
<td>2 semester hours</td>
<td>Foundations of Middle School Education</td>
</tr>
<tr>
<td>EDU 343</td>
<td>2 semester hours</td>
<td>Educational Assessment: Middle Grades</td>
</tr>
<tr>
<td>EDS 323</td>
<td>3 semester hours</td>
<td>Instructional Planning for Inclusive Middle Level Class.</td>
</tr>
<tr>
<td>EDU 391</td>

<td>EDU 345</td>
<td>3 semester hours</td>
<td>Teaching Language Arts in the Middles Grades</td>
</tr>
</tbody>
</table>
This field experience is coordinated with coursework so candidates have the opportunity to implement and evaluate many of the recommended practices. In EDU 344, candidates are firmly grounded in the tenets of effective middle level practices as described by the Association for Middle Level Education (NMSA, 2010) and the Framework for Effective Middle Level Practices (Faulkner, Howell, & Cook, 2013; Howell, Cook, & Faulkner, 2013). In addition to developing a foundation in middle level education philosophy, candidates also complete courses in assessment (EDU 343) and inclusive practice (EDS 323), and they enroll in a methods courses aligned with their selected areas for teaching certification. Classroom assignments are clearly linked to a related field experience in a local middle school (EDU 391) for 6 hours per week (2 days/3 hours a day) for a minimum of 75 hours.

Throughout the semester, candidates increase their awareness of the role of technology through exposure to adaptive devices for students with exceptional needs and investigation of various computer applications. Assessment is addressed through discussion of norm-referenced and criterion-referenced summative assessment, formative assessment, pre-assessment and self-assessment, as well as interpretation of assessment data. During one week of the semester-long field experience, candidates complete a four-day, full-time intensive field experience in which they are immersed in almost every aspect of the middle school program through assignments that require them to provide small-group instruction, observe and work with students in a variety of classes and special assignments, participate in team meetings and professional learning community meetings, assist with assigned teacher duties, and assist with other optional activities such as chaperoning field trips or cultural events.

Candidates are expected to design and teach several lessons during the field experience. At least three lessons are designed and taught by each candidate in the content area corresponding with the methods course for which he/she is enrolled. Each of the three lessons is formally observed and evaluated — two by the PK-12 clinical educator and one by the university clinical educator — using performance-based criteria. The PK-12 and university clinical educators use the EPP-wide assessment rubrics to evaluate the middle grades candidates on their dispositions, lesson plans, and teaching skills. These rubrics are aligned to the KTS, InTASC, and KFfT standards, entered in Foliotek, and available for candidate review and program data analysis. At the end of the semester candidates update their ePortfolio in Foliotek by submitting artifacts and a semester reflection, aligning them to the Kentucky Teacher Standards. To successfully complete Professional Semester I and advance to the next professional semester, candidates must successfully complete all courses in the Professional Semester I, receive an acceptable rating on his/her Foliotek portfolio, and receive a satisfactory dispositions evaluation by both clinical educators.

C. Professional Semester II

Following the successful completion of Professional Semester I candidates may enroll in the next professional semester. The courses included in Professional Semester II are:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Credits</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDU 346</td>
<td>3</td>
<td>Teaching Science in the Middle Grades</td>
</tr>
<tr>
<td>EDU 347</td>

<td>Teaching Math in the Middle Grades</td>
</tr>
<tr>
<td>EDU 348</td>
<td>3</td>
<td>Teaching Social Studies in the Middle Grades</td>
</tr>
</tbody>
</table>

* Students choosing Special Education as a content area are encouraged to take the content methods course during Professional Semester I.
In Professional Semester II, candidates extend their knowledge of effective middle level practice by completing courses that include classroom management (EDU 318), a methods course corresponding with the candidates’ second selected teaching certification area, and a course on content area reading/writing (EDU 304). The literacy course (EDU 304) fulfills EPSB regulation 16 KAR 5:060: Literacy program requirements for middle school, high school, grades 5-12, and grades P-12 certification programs. The course includes learning activities that align to the six International Reading Association (IRA) Standards and require candidates to complete a literacy project that is evaluated in Foliotek.

Like Professional Semester I, classroom assignments are clearly linked to a related field experience in a local middle school (EDU 394) for 6 hours per week (2 days/3 hours a day) for a minimum of 75 hours. During one week of the semester-long field experience, candidate complete a four-day, full-time intensive field experience in which they continue to be immersed in all aspects of the middle school program and are assigned fewer observation-oriented activities. During Professional Semester II, active participation is expected at all levels, including designing and teaching three lessons in the content area corresponding with the methods course for which the candidate is enrolled. Each of the three lessons is formally observed and evaluated – two by the PK-12 clinical educator and one by the university clinical educator – using performance-based criteria. To successfully complete Professional Semester II and advance to clinical experience, candidates must successfully complete all courses in the Professional Semester II block, receive an acceptable rating on his/her Foliotek portfolio, receive a satisfactory dispositions evaluation by the university clinical educator, and complete all clinical experience application requirements.

Candidates in Professional Semester II implement a series of lessons designed to promote candidates’ mastery of the Kentucky Teacher Standards and Middle School students’ mastery of the Kentucky Academic Standards. Candidates design instruction in their content area, based on the Kentucky Academic Standards. They implement lessons in their field experience and reflect on their teaching and impact on student learning. During this semester, candidates again take classes in a cohort and collaborate with peers and clinical educators to plan, implement, and evaluate lessons and units. Technology is used throughout the semester to locate instructional resources and use content related software. Just like in Professional Semester I, the PK-12 and university clinical educators evaluate the middle grades’ PK-12 candidates on the quality of their lesson plans, teaching ability, and dispositions. The same EPP-wide assessment rubrics are used for the evaluations and uploaded in Foliotek. At the end of the semester candidates again update their Foliotek ePortfolio with a reflection of the current semester and corresponding artifacts. Foliotek documents are evaluated by the university clinical educator using the ePortfolio evaluation rubric.
D. Clinical Experience Semester

Professional Semester III is the candidate’s student teaching semester when they enroll in the following course: EDU 495 Clinical Experiences in the Middle School (12 semester hours).

As candidates move through the Middle School education program, they complete requirements in their Foliotek ePortfolio each semester. The ePortfolios are reviewed and checked by the candidates’ university clinical educators at the end of each semester. The candidates cannot move to the next professional semester unless they have met the ePortfolio requirements. The requirements for the ePortfolio include several criteria, such as identifying and uploading artifacts, writing a semester reflection and documenting the EPSB requirements for field experiences (e.g., completing 200 field experience hours, observing in schools, and working with students from diverse backgrounds). In addition to the semester checks, each candidate’s Foliotek ePortfolio and academic records are reviewed by the coordinator of clinical experiences to determine if they have met all entrance requirements for the clinical experience semester.

These requirements include the following:

- Clinical experience application, with medical exam and background check
- At least 200 field experience hours
- Observations in schools
- Observation in related agencies including Family Resource Centers or Youth Service Centers
- Student tutoring
- Interactions with families of students
- Attendance at school board meetings
- Attendance at school-based council meetings
- Participation in a school-based professional learning community
- Opportunities to assist teachers or other school professionals
- At least one diverse placement
- Working with students with Socio-Economic Diversity
- Working with Students with Disabilities
- Working with students who are English Language Learners
- Working with students with Racial/Ethnic Diversity, from a minimum of 2 different ethnic or cultural groups
- Engagement with Middle School, middle grades, and secondary students
- 2.75 overall GPA
- 2.75 pedagogy GPA
- 2.75 content GPA
- Completed all required coursework

If the candidate meets all of the above requirements, they meet with the coordinator of clinical experiences to finalize their admission to the clinical experience semester. The coordinator of clinical experience then begins to work on placing the candidate in an approved middle school. A final check of the above criteria is made at the end of the semester PRIOR to beginning the clinical experience.
Once enrolled in the clinical experience, candidates are engaged in co-teaching for an entire school day, five days per week, for a period of 16 weeks. The candidates are required to work with middle school students for the semester and teach lessons aligned to the Kentucky Academic Standards. If the candidate’s clinical experience is in either Ohio or Indiana, the candidate also aligns his/her instruction to meet the standards established by that state. During the clinical experience semester the candidate is assigned to two PK-12 clinical educators, one in each of their teaching areas, within a 50-mile radius of NKU.

With the guidance of their PK-12 and university clinical educators, candidates are required to demonstrate competency in meeting all of the Kentucky Teacher Standards and the NKU program requirements. Candidates are required to complete a teacher work sample during the first eight weeks of the clinical experience semester. The cornerstone of the teacher work sample is the candidates’ analysis of their respective students’ pre- and post-assessment data. Candidates analyze and reflect on the data to determine the impact their instruction had on PK-12 student learning and state what steps they will take to improve student learning during future instruction. Candidates analyze data for the entire class in addition to at least one identified gap group within that class. During the last eight weeks of the student teaching semester, candidates complete a leadership project to meet Kentucky Teacher Standard 10. Once this project is approved by the clinical educators the candidate plans, implements, and analyzes the data to determine the impact the project had on PK-12 student learning.

At specified times during the clinical experience, candidates’ knowledge, skills, and dispositions are evaluated by both the PK-12 clinical educator and university clinical educator using performance-based criteria. Candidates must successfully complete all clinical experience requirements, receive an acceptable rating on his/her Foliotek portfolio, and receive a satisfactory dispositions evaluation by the university clinical educator in order to successfully complete the clinical experience. At specified times during the clinical experience, candidates’ knowledge, skills, and dispositions are evaluated by the PK-12 and university clinical educators using performance-based criteria. Candidates are formally observed at least four times by their university clinical educator and at least twice by their PK-12 clinical educator. Both clinical educators complete the lesson plan and lesson implementation rubrics, as part of their evaluation of the candidate, and submit their evaluations to Foliotek for candidate review and program data analysis. Both rubrics have been aligned to the KTS, InTASC, and KFFT standards. The PK-12 and university clinical educators also evaluate the candidate on his/her dispositions using the Disposition Survey, which is aligned to KTS, InTASC, and KFFT standards. The Disposition Survey is submitted to Foliotek for candidate review and program data analysis. In addition to the above, candidates are required to submit and successfully complete all of their Foliotek requirements, which include a semester reflection that is aligned to the KTS. Once the candidate has successfully completed all of the clinical experience requirements they are eligible for graduation from the program.

Middle Grades Program Changes:
The middle grades education program faculty engage in a regular and systematic review of data for the purpose of continuous improvement of the program. Over the past three years, our review of data (i.e., PRAXIS, surveys, field/clinical evaluations, dispositions evaluations, advisory committee minutes) has prompted several changes to the program that the faculty believe will enhance the preparation of
middle grades candidates and better meet the needs of our PK-12 partners. The following changes have been implemented as a result of our review of data:

- Our current field experience structure requires candidates to be at their field experience site on Tuesday/Thursday mornings. Due to this structure, candidates were unable to experience consecutive days of instruction. Upon the recommendation of candidates and PK-12 clinical educators expressed in survey data, the program instituted an intensive four-day, full-time field experience in EDU 391 and EDU 394 that began in Spring 2015. Through the intensive field experience, candidates attend the school day from start to finish for four consecutive days allowing them to participate in all of the duties expected of the classroom teacher, teach multiple lessons, and experience consecutive days of instruction. Anecdotal results from debriefing with candidate and cooperating teachers indicate this change has been received positively.

- Data concerning the changing demographics of our region prompted the program to submit a curriculum change to make EDU 316 Racism and Sexism in Educational Institutions a required course rather than a recommended course. This program change went into effect in Fall 2015.

- The area of classroom management is historically an area of concern for most teacher candidates, and this concern was regularly identified by candidates and cooperating teachers in completer surveys as an area for improvement. EDU 318 was originally a 1-credit-hour course making it difficult to address the content sufficiently. In course evaluations, candidates often commented that the credit hours allotted to EDU 318 should be increased. To address this need, the middle grades program submitted a curriculum change to make EDU 318 a 2-credit-hour course enabling the instructor to better address the areas of concern addressed by candidates and cooperating teachers. This change went into effect in Spring 2016.

- In survey data, cooperating teachers regularly identify content knowledge as a strength of the middle grades program; however, a review of the middle grades PRAXIS content examination results showed a trend of lower than desired pass rates in language arts and social studies. The program faculty met with faculty in the Department of English and the Department of History and Geography to review the current required courses for both English and Communication and Social Studies certification. It was determined the content course requirements for English and Communication lacked focus and were not sufficiently aligned with the PRAXIS content examination. The program submitted a curriculum change to remove several elective options from the English and Communication content requirements to ensure candidates were selecting courses that were aligned with the PRAXIS examination and the Kentucky Academic Standards. These changes went into effect in Fall 2016.

Following a review of the social studies content course requirements, the program, in collaboration with the Department of History and Geography, determined the required content courses did not require a program change. To address the concern with the social studies PRAXIS examination results, the social studies methods instructor has incorporated several additional elements to EDU 348 to address both the PRAXIS examination and the Kentucky Academic Standards.

- The middle grades program has always recognized the importance of content area literacy by including a reading course (EDU 304) in the curriculum. To address new state regulations requiring the assessment of ILA standards, the Literacy Action Plan (LAP) and rubric were
created and implemented as a key assessment in Fall 2016. Data from the new assessment will be reviewed when it becomes available.

- As the program considers applying for national recognition by the Association of Middle Level Education, two areas of the SPA standards were not adequately assessed through our current data sources – middle school organization and adolescent development. In Fall 2016, two assignments and rubrics in EDU 344 were redesigned (Autobiography and Middle School Analysis) to address these areas of the AMLE standards. Data from the new assessments will be reviewed when it becomes available.

**EPP Wide Continuous Improvement**

Data are systematically collected, analyzed, monitored, and reported within the Middle School education program and across the EPP. Prior to the start of each academic year, the associate dean and the technology coordinator generate reports from the data housed on the NKU Student Information System (SAP), Survey Monkey database, and the Foliotek assessment system. Those reports, as well as reports from Educational Testing Services (ETS) and the Kentucky Education Professional Standards Board (EPSB), are then shared with faculty during the fall semester to initiate the continuous improvement and reporting cycle.

During the first step in the cycle data are summarized by the associate dean, who also serves as the data coordinator, and then analyzed by program faculty and stakeholders. Faculty in each program review and discuss data at their monthly program meetings to determine strengths and areas for growth in developing teacher candidates who positively impact PK-12 student learning. Possible changes are regularly reviewed with external advisory committees and include such items as course or curriculum changes and additional or revised assessment rubrics.

After program level analysis, the process moves to an EPP wide process through the Teacher Education Committee (TEC). The TEC, comprised of internal and external stakeholders, meets monthly to review and discuss various items, including EPP wide data included on the agenda. Finally, at the end of the academic year, the dean, associate dean, department chair, and a representative from each program serve on the Quality Assurance Committee to review and discuss program data. Each program representative develops a Quality Assurance Report which is then reviewed by the Quality Assurance Committee (QAC) during its annual meeting. Based on the most current data, the QAC discusses findings and makes recommendations for EPP wide changes for the upcoming academic year, thus closing the continuous improvement loop. All program and EPP wide data are displayed on the College of Education and Human Services’ (COEHS) website through its Education Data Dashboard, and disseminated to all internal and external stakeholders. The data dashboard, comprised of data from Foliotek, Praxis, Survey Monkey, and SAP, allows for disaggregation of data by specialty licensure area and other dimensions.

Examples of EPP wide changes over the past three years include the following:
- Review and revisions to the Professional Dispositions Survey;
- Review and revisions to the Lesson Plan Evaluation rubric;
- Review and revisions to the Lesson Implementation Evaluation rubric;
- Tagging all rubrics with CAEP, InTASC, KTS, and KFfT standards;
- Development and implementation of literacy rubric;
- Development and implementation of technology rubric;
- Development and implementation of clinical experience reflection rubric;
• Development and implementation of protocol to determine inter-rater reliability of final clinical experience observation;
• Development of content validity, using the Lawshe method, of various evaluation rubrics;
• Revision of the Teacher Work Sample data analysis spread sheet; and
• Development and implementation of program advisory committees.
