MOVED to First:

f - General Education

LIN 175 (G, older form G, revised syllabus, supporting report) After much discussion and some concern about the SLO's – **APPROVED** (with T. Pence voting NO)

In response to Terry Pence's concerns on whether courses like LIN 175 can qualify as social sciences, Kent Johnson provided this document: Restructuring Social Sciences. He further remarked the following:

Dr. King heads the NSF-SBE (National Science Foundation Social, Behavioral and Economic Sciences) sponsored Institute for Quantitative Social Sciences at Harvard University. He is one of the top Social Science Scholars in the United States. In section 2.3 Dr. King clearly articulates a modern conceptualization of social sciences that represents a consensus perspective. This work is consistent with Karl Poppers conceptualization. From this perspective, Informatics clearly represents a social science field. Kent ran into Belle Wheelan, president of SACS, and asked in passing about this situation. She agreed that these courses (LIN, BIS) should count as social science courses.
