1. Approval of minutes from 10/1/20, 10/15/20, 11/5/10

2. Chair report

- The MS Health Administration new program proposal was not accompanied by the new course proposals for the 10 new courses in the program. We talked about whether we should have the MSHA on the December agenda and attempt to approve it and the new courses prior to those courses being approved by the college committee and grad council. After much discussion and concern that if the college committee were to have an email vote so that we could get the courses after their approval that the college committee might rush their approval through and miss something important, we decided to postpone having the MSHA and the 10 courses on our agenda until our January meeting.
- Deadlines for next fall's catalog are coming up: end of February for new programs and end of March for everything else.
- Our next meeting is December 3 but don't be surprised if it is moved to an email vote depending on the number of items and whether any of those items are controversial.
